2019 Lower Platte South NRD Hazard Mitigation Plan Update

The Lower Platte South NRD is leading the planning effort to update its 2015 Hazard Mitigation Plan, or HMP. Residents and entities across the planning area are encouraged to participate.

Hazards pose **risk** to people, property, the environment, and the economy.

These include but are not limited to: tornadoes, wildfire, severe winter storms, flooding, dam failure, and agricultural disease.

Mitigation is any action that reduces **risk**.

These actions depend on the needs of individual participants, but common projects include backup generators, storm shelters, alert sirens, and education or public awareness programs.

A **Hazard Mitigation Plan**

is a community-driven, living document that **assesses vulnerability** to natural and man-made hazards and **identifies mitigation strategies** to reduce vulnerability.

Why Your Community Should Participate in the Plan:

- » To gain eligibility for FEMA mitigation grant programs
- » To identify strategies to reduce your community's risk to hazards and disasters
- » To build relationships within your community and region that foster resilience across a larger geographic area

Find out how YOU can be involved by checking the project website!
