COMMENT FORM CONTINUED

5. Which draft alternatives seem most promising in reducing flood risk? Please explain.

For quick reference, here's the list of draft alternatives still being considered:

Osmond

1. Berm/levee
2. Nonstructural

Pierce

1. Channel Widening and Culvert Improvements
2. Diversion Channel
3. Levee Improvements
4. Detention Cell and Pump Station
5. Nonstructural

6. What challenges or considerations might affect the implementation of the remaining alternatives?

7. What additional thoughts would you like to share about the draft alternatives?

8. What questions do you still have about the project or draft alternatives?
